

# Biomedical Informatics

By

**Dr. Charles Harlow**

Professor and Bentsen Endowed Chair,  
 Department of Electrical Engineering,  
 University of Texas - Pan American

Dr. Harlow's research interests in the area of biomedical informatics include image processing, biomedical computing, remote sensing, and computer engineering. In this seminar, he will discuss some computational issues in border health and biomedical research. Individuals interested in all these areas are encouraged to attend.

**Bell Hall, Room 143**  
**Friday, October 15, 2004**  
**11:00 AM**

OPEN TO THE PUBLIC
