

What Is Bioinformatics?

by

Dr. David Steffen

*Professor, Department of Molecular and Human Genetics,
and Director, Bioinformatics Research Center,
Baylor College of Medicine, Houston, Texas*

Dr. Steffen will give an overview of the different projects his group is involved in, and how his group is organized within Baylor, what its mission is, and a brief discussion of the range of activities encompassed by the term "Bioinformatics".

Use of High-throughput DNA Sequencing to Capture Genome Variation

by

Dr. David Wheeler

*Associate Professor, Department of Molecular and Human Genetics, and
Co-Director, Bioinformatics Group, Human Genome Sequencing Center,
Baylor College of Medicine, Houston, Texas*

Dr. Wheeler will talk about resequencing the human genome and high-throughput transcription tagging with a smattering of results for each.

BUSN 313

Friday, February 18, 2005

11:00 AM and 12:00 noon

OPEN TO THE PUBLIC
