Course Objectives: The purpose of this course is to have prospective teachers working, in a cooperative environment, with much of the mathematics that they currently, and will in the future, communicate to students. Students in the course will master certain mathematical skills, and will, more importantly, deepen their conceptual understandings of elementary mathematics.

Course Activities/Assignments: Course activities will include classroom activities, out-of-class assignments, one project, four regular exams, and a final exam.

Assessment of Course Objectives: In-class activities and out-of-class assignments will be assessed for completion. The project will be scored on
a rubric emphasizing complete, thoughtful, and correct responses to questions. Regular exams will be scored for correctness. It is expected that students will re-work, and re-submit, essays and incorrect exam answers. The final exam will be scored for correctness.
